

We show our **faces** and start with our names.
I will first say **Annie** and you will repeat my name
(please:)) than **Igor** and last **Nicolas's** name

Then we will do the words (first saying the word
in our own language, than in all three and only if
we did that all three we can go on with the next
step)

"I", (pointing our fingers to ourselves) "**ik**" in
Dutch

"you", (pointing to the webcam, the public) "**jij**"
in Dutch

"he" (I will be pointing to one of you and look
to the other, you will just say the word in your
language) "**hij**" in Dutch

"she" (you will both point to me but look in the
webcam) "**zij**" in Dutch

"we" (I will open my arms as if trying to lay
them on your shoulders, you will do the same with
me) "**wij**" in Dutch

After that we all three will introduce at least
two other words each that we will "learn" to the
others. We can do bodyparts , but also objects
because we can just say "no"
(geen in Dutch) when we cannot show
the object.

We continue learning more words till the 5 minutes
are over, but as I said if it takes longer, it
will be longer, we will do at least two words
each.

The last one will be the **navel**, nombril introduced
by me.

As soon as we succeeded the navel/nombril I will
put down my webcam (please stay filming you
both)and will cut the streams. All will be **black**
again.
